

Dear Chairman Powell,

With all due respect for your efforts on behalf of the owners of media outlets to enlarge their scope and profits let me say that I think they are already too powerful and biased to the right. There is and has been so little news about the occupation in Palestine that I wonder if it is being deliberately blocked. We hear about the suicide bombings in Israel, but, nothing about the root cause --

Israel's brutal occupation. We hear nothing about the shootings, killings, going on every day in Palestinian territory. The focus is on the violence without addressing the grievances of the people that had led to the violence. Already I resent the fact that I have to access the internet in order to get the news or wait for the BCC. We should have more access to diverse opinions and a greater limit on ownership. Sincerely, Aletha Carlton
